

SILICA GEL ORANGE BEADS

Orange Silica Gel has been accepted as the perfect substitute for the indicating type Orange silica gel as it is impregnated with an organic indicator. With silicon dioxide as the main ingredient it has all the properties of Orange silica gel but does not contain cobalt chloride. The composite dyeing agent without pollution to the environment has been successfully adopted during the manufacturing process of the orange silica gel.

FEATURES

Premium Quality Orange Indicating Silica Gel Bulk Desiccant Beads, Industry Standard 2-5mm - Rechargeable (Orange to Green)

Silica beads are perfect for high humidity area living and the least expensive way to get desiccant for home, office, store, boat, and wherever you need things to be protected from unwanted moisture

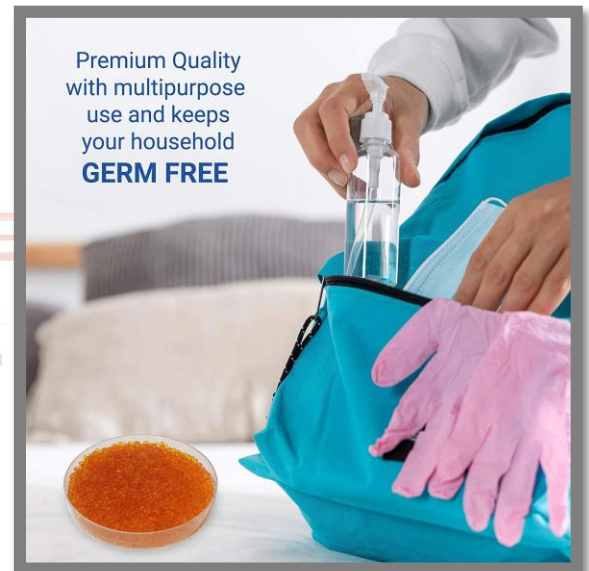

Orange Silica gel Beads have dehumidifying properties. These are not for food grade items.

It's not always avoidable, many of us have at one point unintentionally submerged our phones in water (whoops!). Additionally, not many people think about the effect that humidity and moisture in the air can have on their electronic devices. The effects of water.
